Lesson One: Internet Safe!
Standards/Domain: Network and Internet and Impacts of Computing
Objective: Students will understand what it means to be an active, safe, and responsible citizen when participating in an online community.
Grade: 3-5
Materials: Chromebook/labtop, headphones
Teacher: Access to Microsoft word or Google docs to create the technology contract
Internet Safe (Inderland-google)

- Mindful Moutain- sharing
- Tower of Treasure- security
- Kind Kingdom
- Reality River- scams and cybersecurity
- Anchor Chart Paper with markers or a writing utensil

Activate Schema: Students today we will be discussing the importance of computer safety when participating online and its impacts.

1. What are some things to be aware of when using a computer or technology device safely?

   -Students can come up and write their answers on the chart paper or teacher can depending on class needs
2. How does technology affect our lives and social skills?
3. What impact does technology have for you in school or at home?
4. What does it look like or sound like when you feel unsafe or uncomfortable when online?
   a. Ask for adult help…
5. Who is responsible for making sure they feel safe and follow all procedures when in an online workspace?
   a. ME! Have kiddos then start to brainstorm a technology contract

Whole Group: As a class create a technology contract that both students and parents will sign.
Focus:

- What does it mean to be responsible and safe while online?
- What does it look like to be responsible and safe while online?
- How does being a member of the online community affect your life?

I DO: Explore one of the Interland desitations as a whole class:

1. Type or post to google classroom the URL for interland Interland Play
2. Explore one of the destinations to show students what is expected
   a. Example: Reality River

WE Do: Guide students to follow the steps on Reality River and collaborate ideas to choosing the best solution for each question while building the bridge
Ex: See Images

THEY DO: Students access their computer devices and start exploring the interland options

Vocabulary:

- Respect
- Responsibility
- Safe
- Cybersecurity
- Scams
- Protection
- Fact
- Fiction

Assessment: Informal observation of students participating in discussions, exploring and engaging in Interland (could set a number of correct questions answered as a score), and creating a technology contract.
